*choose one option only

Your suggestions:

- About the process of practice organisation

Everything was well-organised and clearly understandable.
 During the introduction the practice tasks and the reporting process were well explained.

- About the cluster of practice documents

The practice documents are easily accessible on the web page. And they are user-friendly as well.
 However, could one agreement be enough?

- Other matters related to practice

All questions related to practice were easily solved when I asked.
